

Yipes Expands Its Network To IXXEurope's Collocation Facility To Provide Ultra-Low-Latency Access To Financial Trading Platforms In Frankfurt

IXEurope's Customers Have Direct Access to More than 350 Exchanges, Trading Platforms, Brokerages, and Traders on the Yipes FinancialConnect! Network

San Francisco - July 23, 2007 - Yipes Enterprise Services, Inc., the leading global provider of managed Ethernet services, announced that it is expanding its network by adding a point of presence (POP) at IXXEurope Plc's collocation facility in Frankfurt, Germany. IXXEurope is one of Europe's largest and fastest growing datacenter services companies, operating 14 mission-critical IXXDatacenters™ in four countries.

Yipes customers will have access to the exchanges and trading platforms within the IXXEurope datacenter via the IXXEurope Financial Exchange (IXFX™), an interconnection and exchange platform within IXXDatacentres. IXXEurope customers will have direct access to the Yipes global Ethernet network and the Yipes FinancialConnect! platform, the first Ethernetbased financial Extranet for electronic trading. Yipes FinancialConnect!, backed by service level guarantees to support low-latency trading, links more than 350 exchanges, trading platforms, brokerages, and traders.

Yipes' full POP facility within the Frankfurt IXXDatacenter enables IXFX customers to execute financial transactions with a minimum of latency, an optimum solution for firms looking to deliver "best execution" trading under the Europe-wide Markets in Financial Instruments Directive (MiFID) initiative and to support algorithmic trading. IXXEurope also offers data center and business continuity services to other vertical markets, such as legal, on-line gaming, hosting, and insurance.

"Yipes brings to the IXFX community in Frankfurt, including Deutsche Boerse Systems, the best connectivity to the U.S.," said Guy Willner, chief executive officer at IXXEurope. "Working with Yipes gives IXXEurope leverage into financial markets in both the U.S. and Europe."

"Our agreement with IXXEurope furthers our global strategy to establish Yipes as an application service provider in Europe, particularly in the financial market," said John Scanlon, chief executive officer at Yipes. "Frankfurt is at the crossroads of Europe, making it an excellent place to facilitate high-speed Ethernet communications throughout the region. And because our POP is a neutral facility with great diversity, we can offer communications services to any market."

About IXXEurope - www.ixeurope.com IXXEurope is one of Europe's fastest growing providers of datacentre services. Its principal activities include primary datacentre services, connectivity services and business continuity solutions. IXXEurope works with enterprise and Internet customers to provide resilient datacentre infrastructure to house their IT systems far more cost-effectively than through in-house provision. The benefits include optimised IT performance, improved systems availability and reduced corporate risk through improved regulatory compliance. By continually focusing on quality, IXXEurope also gives clients exceptional service levels and on-site access to a high level of technical expertise.

With award winning datacentre facilities in key European cities, broad technology expertise and a proven track record, IXXEurope provides solutions that give customers the confidence that their operations are protected. The Company is ISO 9001:2000 certified and has over 450 customers

in the enterprise, Internet and networking markets including Merrill Lynch, Deutsche Borse, Citigroup, Rackspace and SurfControl.

IXEurope is listed on the London Stock Exchange Alternative Investment Market.
